

HOT & COLD PURIFIED WATER DISPENSER

- Elegant design fits comfortably into a modern/contemporary domestic or commercial kitchen. Ideally suitable for any office, school, medical clinic or public area.
- Sophisticated control panel enables the provision of hot and cold water at the touch of a button. Parental control via a child safety lock, overrides the dispenser.
- Environmental and user friendly design provides simple and safe operation.
- Removable and replaceable advanced 4 stage Filtration System, which effectively removes the bacteria, chlorine, fluoride and other harmful substances.
- Eliminates the need to buy expensive commercial unfiltered bottle water.
- Guaranteed refreshing and pure clear spring drinking water.

Watertemp - HOT & COLD WATER PURIFIED DISPENSER

※ Why Watertemp

REFRESHING PURE FILTERED WATER

1) Manufacturing Plan

Our factory boasts an annual capacity of more than 500,000 units of hot and cold water dispensers and more than 5 million sets of stainless hot and cold tanks, produced annually.

The selection of a company to manufacture our quality product is based on in-house production facilities plus a very close association with the design team, skilled management and production team.

2) Quality Control Guaranteed

Our management includes a highly professional well-educated and experienced research and development team who oversee the production of new products plus the manufacture and quality control of all production.

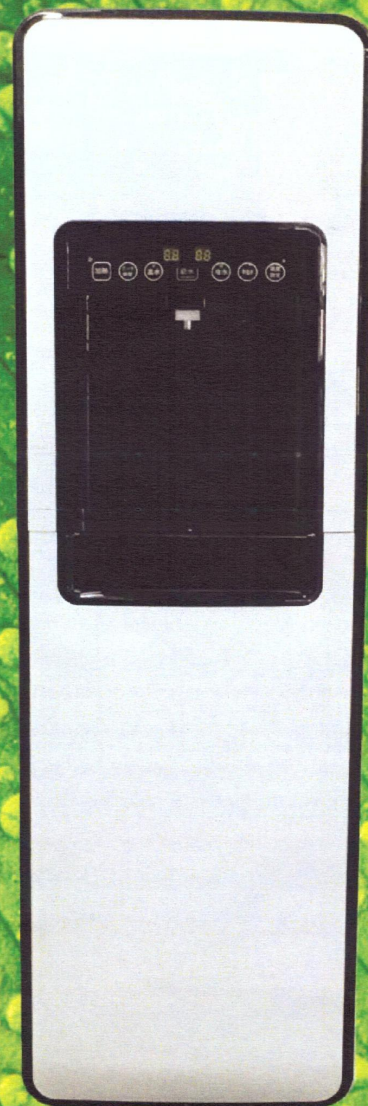

Quality controlled and detailed testing of every component of all units to ensure that no system can leave the factory faulty.

3) Team effort

This team of experts ensures and guarantees the stability and quality of every product manufactured. Plus the production and delivery on time - all the time.

Enjoy purified water for healthier life
